

# WATER MANAGEMENT

## Sealants, Grouts, Coatings & Concrete Waterproofing

### Repair Solutions

- **SealGuard:** polyurethane grout for high-inflow
- **Hyperflex:** polyurethane grout for low-inflow
- **X-Seal:** polyurethane adhesive sealant
- **GreyCoat Epoxy:** 100% solids epoxy coating
- **Pow-R Repair:** fiberglass pipe repair wrap
- **SilverBack XL:** extended flexible coupling
- **Basement Repair Kit:** repairs basement leaks and cracks

### S1E Water Management Benefits

- Creates structural repairs
- Long-lasting and durable
- Reduces product waste
- Environmentally friendly
- Fast installation and cure times
- Enhances product performance
- Keeps repairs on-time and on-budget
- Only small repair crews required
- Minimizes long-term maintenance
- Solutions for every water management need

## Customer Testimonial

"After experiencing issues with contractor and having acrylamide grout fail on a number of manholes, we decided started to search for a material that offered the results we needed. Finding S1E, it is with great pleasure to say that this product and company have restored our hopes in the grouting industry. The following shows statistics that we have tracked since using your product: grouted 186 manholes, stopped 531 gallons of infiltration and used 230 man-hours in the process. Our calculations of 531 gallons per minute x 24 hour period is 764,640 thousand gallons of infiltration stopped, our plant capacity is 4.5 mgd, which shows that we have reclaimed 17% of our plants capacity."

# WATER MANAGEMENT

## Grouts & Sealants

The SealGuard product line includes hydrophobic polyurethane grouts that effectively seal against water infiltration. Versatile for water management applications, the SealGuard products work in both high-flow and low-flow situations to structurally rehabilitate foundation. The grout is easy to use, with the ability to cut, sand and paint to match existing wall profile. S1E also supplies Pow-R, repair wraps that seal any type of pipe or hose in a multitude of sizes for any emergency situation.

## Basement Repair Kit

S1E's Basement Repair Kit is an advantageous DIY kit for the homeowner or contractor looking to rehabilitate cracks in foundation walls. S1E's quality products, Grey-Coat Epoxy and Hyperflex, work together to form a seal that is un-like anything on the market today. Whether your walls are leaking now or beginning to develop foundation issues, this kit can act as a long-lasting and reliable repair that will give you professional confidence.

## Epoxy Coatings

GreyCoat Epoxy is a 100% solids epoxy that offers chemical resistance and durability with adhesion to concrete substrates and metal surfaces. Prepackaged as a no-mess coating system with excellent coverage and shrink resistance, GreyCoat is ideal for rehabilitating a manhole bench or structural spot repairs. GreyCoat builds up to ¼" (250 mils) without sag and exceeds the most demanding engineered specifications.

## Pipe Connections

SilverBack XL is an extended flexible coupling designed for pipe bursting and pipe ramming connections. Due to its extra-long length, tough PVC material and heavy-duty shear ring, this product is an ideal addition to any pipe bursting or ramming equipment. Contractors will be able to easily connect the two pipes together without having to worry about soil conditions or tensile stressing altering the pipes structural integrity.
